Sam-Pall

A dual-component intermediate bulk container comprising a specially designed pallet with corrugated base flap fixtures, and a heavy duty corrugated container made from heavy duty board.

Key Features:

- Suitable for heavy duty industrial components such as automotive parts, plumbing fittings and stationary
- Reduces warehouse costs. The Sam-Pall can be column stacked or used in a racking system
- Can be printed with corporate branding
- Quick and easy to assemble
- Cost effective and reusable
- Available in a range of sizes, and custom sizes are available on request
- Optional design features include cell dividers, short flaps with top cap and drop front panels
- Sam-Pall's are only available on a wooden pallet
